About This Game

I'm a hunter, a soul hunter. It sounds a little weird. There aren't many people like us. Nobody knows we exist, but we do.

One of the news I've seen these days is that a house in a small town is so weird that five families have moved out for special reasons. They say they've had a weird event, but nobody believes it.

I decided to investigate, hoping to gain some results.

This is a game of survival decryption.

Game Tips:

1. Salt props can attack ghosts.
2. The cabinet can avoid the attack of ghosts.
3. Electromagnetic waves can perceive the distance from ghosts.
4. Turn over the cabinet to find more salt and flashlight batteries.

Come and explore the mystery.

Title: THE SOUL HUNTER
Genre: Action, Adventure, Indie

Memory: 4 GB RAM

Graphics: NVIDIA GeForce GTX 550 / AMD Radeon HD 6770

Storage: 200 MB available space

English,Japanese,Simplified Chinese

You die and die and die. There's no resource info. You can't save. No cheats. Lame.. This game needs a lot of work. When I was playing I admitted I wouldn't remember all the keys because they were just so random and a weird selection, H to come out of the closet R to use your flashlight in my opinion that's just weird for me.

I seen to have all the keys I need but I can't open the rest of the rooms.

Also sometimes my character seems to be being pushed all the time.

I like the fact that you can save the game but that's about it for me.
